Action Information		
<p>Description: Called Con-Edison to determine status of the spill at ths time. Currently the spill is not contained and the source has not been found. The spill is within the Manhattan sewer system and outfalls are being checked to ensure no dielectric fluid is present at the outfalls.</p> <p>An excavation contractor and response contractor are on-site. Once the source is determined, Con-Edison will clamp the source and mitigate the spill.</p> <p>Follow up phone calls will be placed.</p>

Duty Officer/Responder Name: Staiger	NRC Report #: 968020	Hotline Log DataID: 933140
Action Information		
<p>Description: As of 0800 hours, the location of the source of the leak has been discovered and the Con Edison contractors are taking measures to stop the continuous release of dielectric fluid into the NYC sewer system. Currently there have been no impacts to the Hudson River, but to ensure that no oil reaches the waterway, Ken's Marine (contractor to Con Ed) is checking the waterway from 38th Street to 135th Street (near the STP).</p> <p>There was an 800 gallon loss of oil during the initial discovery, and the line that was leaking runs at a pressure of 500 gallons an hour. The pressure in the line was reduced once the loss was noticed. The leak has occurred for a total of 10 hours so far. The final total of oil released is not known at this time, but will be determined in follow up phone calls.</p> <p>The NYCDEP, Andrew Kelly, initially responded to the release. Con Edison has been told to clean the oil from the sewer system and notify the waste water treatment plant. NYCDEP is monitoring the progress of the spill.</p> <p>Updates to follow.</p>
